Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions ...

Pressured by curtailments of renewable electricity and frequent outages amid a lack of flexibility, Cyprus is in a rush to install battery energy storage systems (BESS).

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid ...

The successful commissioning of the first significant energy storage system in Cyprus represents a major milestone in the country's transition to a sustainable energy future.

What are energy storage technologies? Informing the viable application of electricity storage technologies, including batteries and pumped hydro storage, with the latest data and analysis ...

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for ...

For years, Northern Cyprus has danced this frustrating tango with unreliable energy grids. But here's the twist: The region is now leading a power storage revolution that's ...

In a move set to transform the country's energy landscape, the Cyprus Energy Regulatory Authority (CERA) has greenlit the development of three state-owned battery ...

From battery chemistry breakthroughs to smart grid integration, Northern Cyprus' energy landscape is
