The world's first public road that includes embedded solar cells has opened in the town of Krommenie in the Netherlands, NPR reports. The crystalline silicon solar cells are encased in ...

The first stretch of road completed was just over half a mile long and was expected to power up to 5,000 homes, but it became clear rather quickly that expectations ...

Burkina Faso has just shocked the world with one of the boldest infrastructure projects in African history -- the construction of Africa's very first glass roads.

Needless to say, such glass does not exist yet but Brusaw hopes to partner with researchers at The Pennsylvania State University's Materials Research Institute to develop it.
