Does Tonga have Internet?

Broadband internet communication is provided by the Tonga Cable System that went online in April 2018. On 15 January 2022, following a volcanic eruption on the island of Hunga Tonga-Hunga Haʻapai, the Tonga Cable System was severed, leaving the country without Internet access.

Why are satellite phones not working in Tonga?

Tonga signed a 15-year deal to secure satellite connectivity following an earlier cable break in 2019 from a ship's anchor. But the use of satellite phones has been affected by the volcanic ashblanketing the country. Some people have reported they can only dial out - and not receive calls.

How did the blackout affect Tonga?

The blackout caused major disruptionto aid efforts following the disaster. Limited satellite connectivity has provided some relief but communication remains difficult as some outlying islands are still cut off. Tonga signed a 15-year deal to secure satellite connectivity following an earlier cable break in 2019 from a ship's anchor.
