How big is the 5G base station market?

Macro cells represented USD 22.9 billion and 61.3% of the 2024 5G base station market share, providing umbrella coverage and mobility anchor services. Yet small cells are forecast to expand at a 29.4% CAGR, pushing their slice of the 5G base station market size toward USD 50 billion by 2030.

Which 5G base station market dominated the global market in 2023?

The Asia Pacific 5G base station market dominated the global market in 2023 and accounted for 32.67% of the revenue share.

How will Europe's 5G base station market evolve from 2024 to 2030?

The Europe 5G base station market is poised for significant growth from 2024 to 2030. The European regulatory environment supports 5G deployment, with policies designed to facilitate the rollout of 5G infrastructure. This includes streamlined permitting processes, clear spectrum allocation strategies, and efforts to reduce regulatory barriers.

What is the 5G standalone segment?

The 5G standalone segment is expected to grow significantly from 2024 to 2030. The 5G standalone architecture is designed to fully leverage 5G's capabilities, providing ultra-low latency, higher data rates, and greater network flexibility.

Dublin, Jan. 02, 2025 (GLOBE NEWSWIRE) -- The "5G Base Station - Market Share Analysis, Industry Trends & Statistics, Growth Forecasts (2024 - 2029)" report has been added to...

The market for 5G base stations expands quickly because 5G network installations across the globe require faster speeds, reduced delay, and enhanced connectivity.

The Sub-6 GHz segment dominated the 5G small base station market, holding around 72% of the market share. The mmWave segment, while smaller, accounted for 28% of the total market ...
