The rise of solar power could give them a new source of growth. Solar power has become the largest source of clean energy in Japan this year.

TOKYO -- Japanese trading house Sumitomo Corp. will spend 200 billion yen (\$1.3 billion) to set up battery facilities across Japan to store excess power generated by wind or ...

Tokyo Asset Solution will diversify into battery storage, starting with a 4.9MWh grid-scale project in Hachioji City, Tokyo, and a co ...

Tokyo Asset Solution will diversify into battery storage, starting with a 4.9MWh grid-scale project in Hachioji City, Tokyo, and a co-located 8.3MWh system at the ...

With its updated energy storage policy, Japan aims to achieve 45% renewable electricity by 2030 while solving the ultimate puzzle: how to store sunshine and wind like ...

As Japan pushes toward decarbonization, energy storage is no longer optional infrastructure--it's a strategic hinge between climate ambition and energy security.

Japanese real estate developer Tokyo Asset Solution Co Ltd is entering the battery storage business with two projects totalling 13.2 MWh, it announced recently.

This trend is particularly relevant in Japan, where the combination of solar panels and energy storage systems creates an efficient and reliable clean energy ecosystem, ...

After more than a decade of experiment, we developed the EV Battery Station, a large-scale energy storage
