Australian utility Origin Energy has started constructing its 300MW/650MW Mortlake battery energy storage system in Victoria, Australia.

Origin Energy has officially begun building a 650 MWh battery energy storage system alongside its gas-fired power station at Mortlake in southwest Victoria, saying the ...

The Victorian Big Battery is a grid-connected battery energy storage system (BESS) facility adjacent to the Moorabool Terminal Station (substation) near Geelong in Victoria, Australia ...

The successful deployment of this landmark battery storage system signifies a hopeful shift towards dependable renewable infrastructure, supporting a vision where ...

It's the first time Victoria's growing portfolio of big battery storage facilities has achieved a combined charging rate of more than one gigawatt -- making it the first state in ...

Victoria, Australia, surpassed 1 GW of energy storage project charging capacity for the first time, with peak wind and solar curtailment reaching 906 MW. Victoria became the first Australian ...

Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient. Our modern ...

Origin Energy has officially begun building a 650 MWh battery energy storage system alongside its gas-fired power station at Mortlake in ...

The battery will soak up and store cheap renewable energy during the day that can be pumped back into the
