At least 13 member states hit monthly solar power records, including the Netherlands (40.5 per cent) and Greece (35.1 per cent), ...

The report underscores solar's increasing role in securing energy independence and meeting climate targets. Germany, Spain, and Italy continue to lead the charge, but ...

In June 2025, solar was the largest source of EU electricity for the first time, with multiple countries producing record amounts of solar power. Wind power in the EU started the ...

Sunny summer conditions delivered record photovoltaic (PV) production across much of western Europe in June 2025, as high pressure systems brought sustained clear ...

Historically, Germany and Spain dominated Europe's solar capacity, but recent cost reductions and efficiency improvements have led to a more widespread adoption across ...

Find the most up-to-date statistics about the solar photovoltaic industry in Europe

Sunny summer conditions delivered record photovoltaic (PV) production across much of western Europe in June 2025, as high ...

Solar electricity production in Europe during the first quarter of 2025 was up by over 30% from the same months in 2024, setting the stage for full-year record performance ...

Even in the dead of winter, Europe's solar farms have continued to expand their share of electricity production throughout the continent.

Western Europe Power Supply Solar System Production
