Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT ...

The rise of Hungary's power storage reflects a strategic shift toward resilient, sustainable energy ecosystems. From cost-saving industrial applications to grid-scale stabilization, ...

Unlike residential storage systems, the Pecs project incorporates second-life EV batteries - a cost-effective approach reducing raw material costs by 30-40%. Imagine giving retired electric ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

At the 2025 student-led MIT Energy Conference, energy leaders from around the world discussed how to make green technologies competitive with fossil fuels.

Summary: Discover how Hungary's strategic hub in power storage is revolutionizing energy storage exports. This article explores industry applications, market trends, and why European-made ...

Taiwan's Innovative Green Economy Roadmap (TIGER) is a two-year program with the MIT Energy Initiative, exploring ways that industry and government can promote and adopt ...

Located in southern Hungary, the power storage energy storage project utilizes vanadium redox flow battery

(VRFB) technology. Unlike lithium-ion batteries, which dominate the market, flow ...

Hungary's city of Pecs has quietly emerged as a hotspot for household energy storage manufacturing. With rising demand for renewable energy solutions, factories here are driving ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

This article explores the growing role of supercapacitor modules in renewable energy, transportation, and industrial applications, with insights into why Pecs-based manufacturers ...
