How many T-bane lines are there in Oslo?

The T-bane network consists of five main lines, numbered 1 through 5, all converging in a shared tunnel system beneath central Oslo. The system spans approximately 85 kilometers of track and serves 101 stations, making it one of the world's longest metro systems by total length. Key Stations and Destinations

What is the main railway station in Oslo?

Oslo Central Station (Norwegian: Oslo sentralstasjon, abbreviated Oslo S) is the main railway station in Oslo, and the largest railway station within the entire Norwegian railway system. It connects with Jernbanetorget station, which is served by trams and the Oslo Metro.

How many tracks does Oslo Central Station have?

Oslo Central Station has 19 tracks, 12 of which have connections through the Oslo Tunnel. The station has two buildings, the original Oslo East building and the newer main building for Oslo Central. Each building houses a large shopping centre. The square in front of the station is called Jernbanetorget.

Why is Oslo V a secondary railway station?

Oslo V always remained a secondary railway station in Oslo, since it mostly served local traffic to Buskerud, Telemark and Vestfold in addition to the Østland Line.
